

## OJT A EMBRAER ERJ 190

### Participants

Any person who is employed in an aircraft maintenance organisation.

### Training objectives

This training course allows trainees to acquire the level of theoretical knowledge and practical skills required by the civil aviation authorities to perform simple tasks on aircraft.

### Course content

The training consists of performing several maintenance tasks covering many ATA chapters. Once the tasks have been completed, trainees will be able to reproduce them in operational conditions.

### Prerequisites

EASA Part-66 Category A license.  
Trainees must be able to read, write and speak the language chosen for the course.

### Details

#### Details of the theoretical exam:

N/A

#### Teaching methods:

Aircraft maintenance tasks

#### Details of the practical part:

Practice is carried out on an EASA Part-145 maintenance site.

#### Disabilities:

If necessary, our disability referent will help you to develop a pathway for your trainee.
