

HOP!

HUMAN FACTOR - SMS

Participants

Any person who is employed in an aircraft maintenance organisation.

Training objectives

Trainees will be introduced to the vocabulary currently used in aeronautical safety.

They will then be able to understand and identify simple ways to avoid human error.

They will become aware of their own physiological limits, thus increasing their safety at work.

Course content

General information on human factors.

Organisational factors.

The physical work environment.

Human performance and its limits.

Communication.

Human error Safety procedures.

Consideration of human factors by the organisation.

Prerequisites

Trainees must be able to read, write and speak the language chosen for the course.
